

Hidden Target Workout Student Instructions

Welcome to Hidden Target workout, in which you will exercise your ability to perform the early stages of cyber reconnaissance. Start by logging in with the credentials provided on the landing page.

1. Open the Zenmap application on your machine by going to *Applications Internet Zenmap (run as root)*
2. Enter the password: 'Let's workout!' (no quotes)
3. Perform a quick scan of the network from Zenmap
4. Look for ports that might provide you information about the target. Check out this website for some common network ports to search for: [https://en.wikipedia.org/wiki/Port_\(computer_networking\)#Common_port_numbers](https://en.wikipedia.org/wiki/Port_(computer_networking)#Common_port_numbers)
