Account Control Workout Teacher Instructions

Introduction

For this workout students will learn to add users to a windows group and assign that group to a folder's permissions.

Mission

1. Close out of the Server Manager by clicking the X in the corner.
2. After logging into the workout control virtual machine click on the Window start button and start typing in **Active Directory Users and Computers**. Click on it when it pops up.
3. Scroll down the list of users and groups until you find a group that is called **Workout Users** and double click on it.
4. A window will pop up, click on the **Members** tab at the top of the window.
5. Click the **Add** button at the bottom of the window and enter the following users. When typing in names users are separated by a semicolon.
   a. Joeschmoe
   b. Hansdown
   c. Guymann
   d. Johndeer
   e. Indigoviolet
6. Click the **Check Names** box next to the box. Users should now be underlined if you did it correctly. Click the **OK** button to add the users to the group. This will close the box. Click on Apply then OK. The five users are now a part of the group.
7. Right click on the folder **Account_Control** on the desktop and click on **Properties** at the bottom of the menu.
8. A window will pop up. Click on the tab labeled **Security** at the top. On the security tab click **Edit…** below the first box.
9. Click **Add…** and in the textbox type in **Workout Users**. Click **Check Names** and should underline if you did it correctly.
10. Click **OK** to exit the menu then click **Apply** and **OK** to apply the change. You may now exit any windows that are open.
11. Wait for the blue Powershell window to pop up as this checks for completion.
